Innovative

Skip2PBX lets you use Skype™ in new and different ways.

- Users won't need a Personal Computer.
- Users won't need headsets or microphones.
- USB telephones not necessary. Users can call with your traditional desk phones.
- Video Calls, Chats and File Transfers will not take place through your office system.
- Skip2PBX simply works as a Gateway so that all installation and updating time for your employees is reduced to zero!
- SAVE up to 100%
- With Skip2PBX you can continue using all traditional phone exchange functions such as call forwarding, multiple calls, and so on.

Calling with Skype™, also in your company!

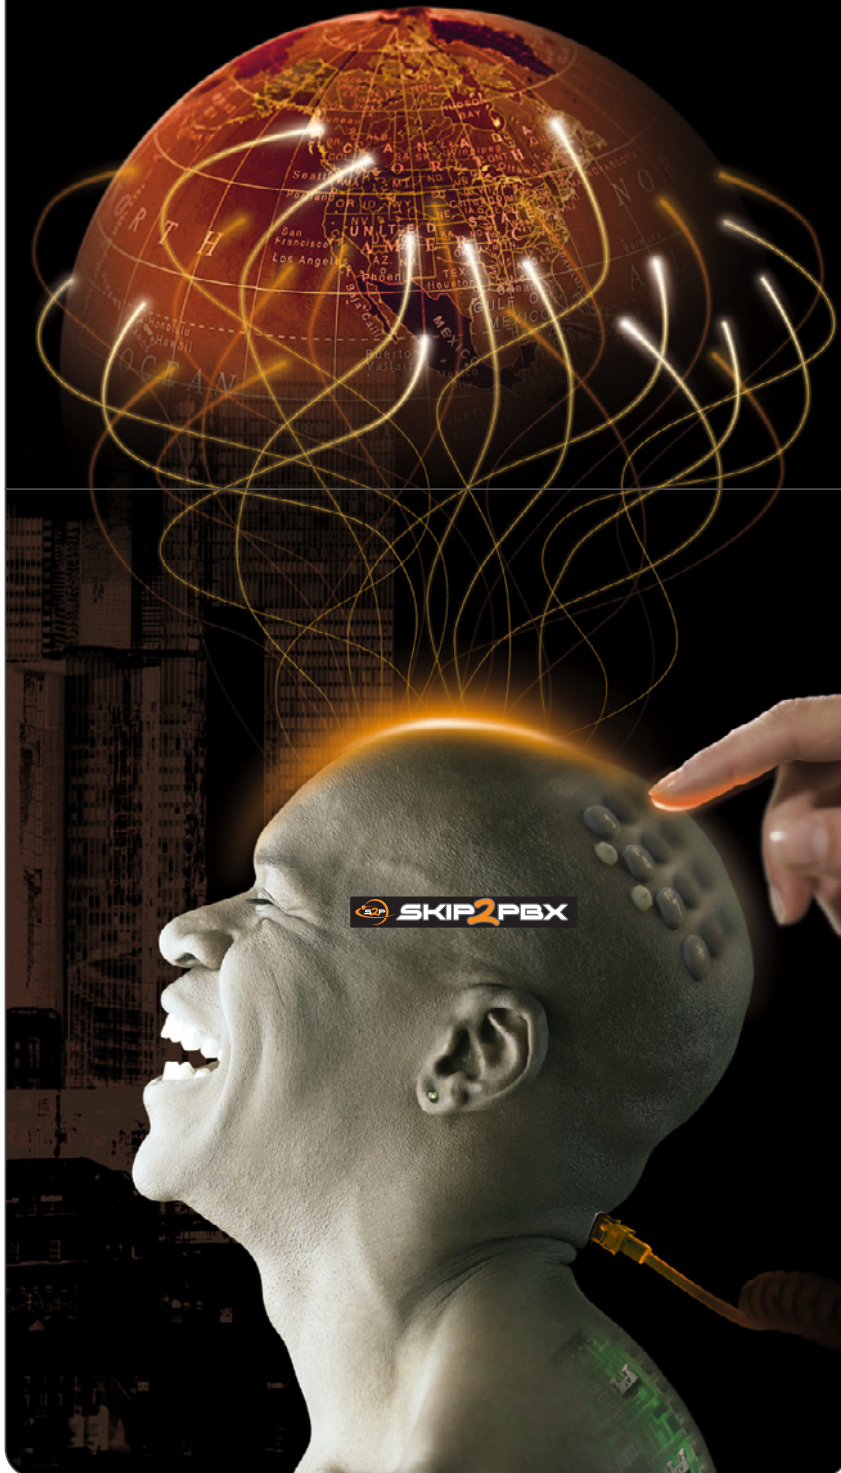

Skip2PBX Basic Edition 2 Lines
(expandable up to ten lines)
Supports Eicon ISDN BRI, Digium ISDN, FXO and FXS cards, Sangoma cards, USB Box or SIP!

Skip2PBX Enterprise Edition 30 Lines
Supports 30 Simultaneous Lines, Eicon Diva ISDN, BRI/PRI, Digium ISDN, FXO and/or FXS Sangoma, USB box and/or SIP!

Skip2PBX is easy to use and simple to install. Your company can call with Skype™ while continuing to use your traditional desk phones: You'll just have to pick up your phone and start talking! →

Plus, by installing Skip2PBX, You'll no longer have the need for headsets and microphones.

Set up Skip2PBX and each phone in your company will be able to call with Skype™. All you have to do is press a pre-set number (8 for example) and Skip2PBX will find an open line. A simple speed dial "shortcut" will then assign the Skype™ name that you're calling to the particular call. You can also receive all calls (including Skype™ calls) through your phone exchange. This way you will gain all of Skype's services including Skype-to-Skype FREE calls, SkypeOut which provides you with great savings while calling traditional lines, and SkypeIn which allows you to receive international phone calls at special low rates.

Simple

Skip2PBX is easy to set up. A few simple, guided configuration steps and it connects to your company's existing phone exchange.

SKIP2PBX

Calling with Skype™ also in your company!

FREE CALLING
with over 180 million other
Skype™ users around the world.
Call them all from your company!

Saving money

You can set your company's international phone bill to zero! Skype-to-Skype phone calls are, in fact, FREE. The more people add Skype™ with Skip2PBX to their business setups, the more YOUR COMPANY saves money (Save up to 100%). Many existing Skip2PBX customers are now converting their suppliers, clients and partners to Skip2PBX in a conscious effort to spread and increase these savings.

SkypeOut allows you to also make calls to traditional phone numbers. Landline or Mobile! Skip2PBX also now functions via SIP!

Check each country's SkypeOut rates and discover more about Skip2PBX's newly added SIP support functions at:
www.skip2pbx.com

SkypeIn creates a way for you to receive landline and mobile phone calls through Skype™. In this way, you'll be able to receive international phone calls at a local rate. PLUS! With Skip2PBX's unique and special Automated Free-Line Detection* feature, YOUR company will be able to RECEIVE up to 30 CALLS all on the very same Skype™ account number! Find out more about this feature and about SkypeIn numbers at:
www.skip2pbx.com

Using Skip2PBX you can:

1 Make FREE Skype-to-Skype calls.

2 Call with SkypeOut services also from traditional phones. Place money-saving calls to anywhere in the world.

3 Receive Skype™ phone calls also from traditional landline and mobile phones using money-saving SkypeIn numbers.

Cutting your company's phone bill using Skip2PBX:

- Skip2PBX reduces your number of Telco POTS lines by replacing them with Skype™ lines.
- Skip2PBX creates a Voice Intranet network which is useful for making FREE Skype-to-Skype phone calls between your company's different locations.
- Eliminate 1-800 expenses.
- Cut these costs by using a Web-based Click-to-Dial system brought to you exclusively by Skip2PBX.
