**ZETAfax**<sup>®</sup> for Networks  
Point. Click. Fax.  
**Corporate Edition**

**Fast, easy faxing for 50 or more network users.**

**Benefits**

**'All-in-the-box': provides complete network fax solution for 50 or more network users**

**Easily integrated with existing software systems**

**Fast and straightforward to install**

**Supports the latest platforms, is reliable and robust**

**Includes one year's Software Assurance**

Zetafax for Networks – Corporate Edition includes the Zetafax Server, clients for the stated number of users and support for two fax lines. It also includes the Zetafax Email Gateway, DDI routing, queue management, remote monitoring and report writing. Faxes can be sent from the Zetafax Client, Web Client or email clients and Microsoft Office. Faxing from other business applications can be enabled using the optional API Toolkit.

**Fully featured for corporate needs**

The Corporate Edition includes Least Cost Routing (LCR), support for Exchange clusters and Windows child domains for the Zetafax Email Gateway. It also includes Software Assurance for one year. A range of fax hardware devices including intelligent fax boards, ISDN controllers and V.34 modems are supported, enabling high volume faxing and direct-to-desktop DDI faxing.

**Fast and easy installation and configuration**

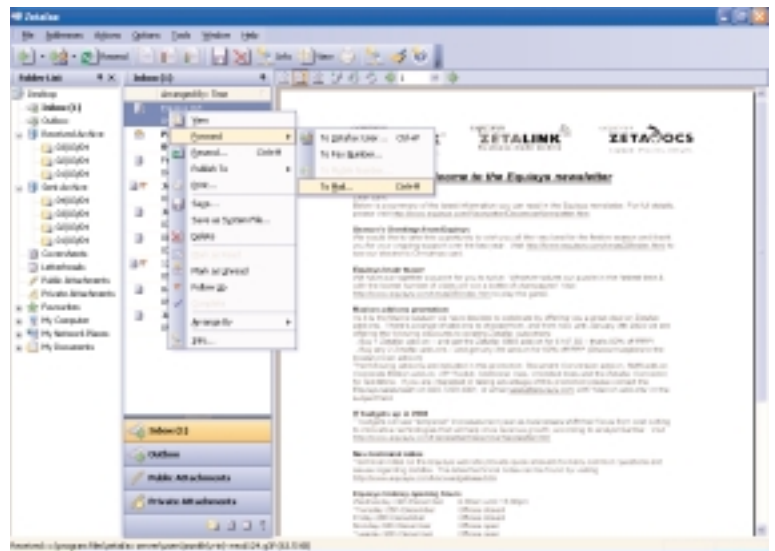

For easy deployment, the Zetafax Server is installed using MSI install and an installation and configuration wizard. Zetafax also supports Group Policy, so that if desired the Zetafax Client can be deployed centrally to multiple desktops very quickly.

**Complete communications control**

Includes a rich range of management features including full fax log records, charge codes and audit trails, so fax usage can be billed to specific departments or clients.

**Ideal for deployment across multiple or remote sites**

Network administrators can manage fax servers from a single location using remote monitoring, queue management and the MMC configuration module. The Zetafax Client can be installed on an application server so network users in branch offices can be fax-enabled via existing thin client sessions over a WAN.

# Equisys is one of the world's leading fax technology innovators.

## User feature highlights:

- Intuitive Microsoft Outlook 2003-style fax client with address book, system tray alert, preview pane and customizable shortcuts
- Ability to fax direct from Microsoft Office documents, Email Client, Web Client and any application enabled with the optional API Toolkit
- PDF document conversion, for forwarding of inbound faxes to any PC user
- Broadcast fax capability with advanced embedded addressing for easy management and personalization
- Multi-doc feature for combining multiple documents such as letters and spreadsheets into a single fax
- Automatic redial if busy and auto-printing of failed faxes
- Choice of addressing options from the integrated Microsoft Outlook address book and Zetafax private and public address books.

## Administrator feature highlights

- Support for Exchange 2003, Office 2003 and Lotus Domino 6.5
- Choice of manual or automated routing of inbound faxes to individual PCs and network printers
- Support for Group Policy, allowing centralized installation of multiple clients
- Fax queue management for aborting or rushing of faxes
- Support for a range of fax hardware including V.34 modems, intelligent fax boards and ISDN controllers
- Supports clustered Microsoft Exchange server environments, Windows child domains and Least Cost Routing
- Allows automatic user account creation
- Reporting module provides full fax log records, charge codes, audit trails and archiving features
- Active Directory integration: the Zetafax Client checks Active Directory for the server's location, so no client reconfiguration is needed at the desktop.

## Next steps
